With this operation, more than 141,000 people will have new or improved access to electric power for domestic and productive use through grid extension, construction of mini ...

Contact us today to explore customized solar solutions for your needs, whether you're interested in grid-connected, off-grid, or hybrid solar systems. Our team at Solarvance is here to guide ...

The Altiplano plateau in western Bolivia has some of the world's highest and most consistent levels of solar radiation, creating high ...

Given Bolivia's strong and consistent solar radiation, the country has high potential to expand its photovoltaic energy production capacity, and new plants with an ...

Learn how InnovaSol is leading the transition to renewable energy in Bolivia with efficient and accessible solar solutions. Find out more here!

Solar power offers a viable solution for electrifying remote communities in Bolivia. Off-grid solar systems can provide reliable electricity to areas lacking connection to the ...

With this operation, more than 141,000 people will have new or improved access to electric power for domestic and productive use ...

The new solar photovoltaic plant, with an installed capacity of 120 MW, the largest of this technology in the country, will be built in the ...

Bolivia's interconnected electricity grid primarily serves the more populated highland region. Grid infrastructure is operated primarily by the state-owned utility, ENDE, with several other private ...

The project was implemented as part of the GIZ Programa de Energías Renovables y Eficiencia Energética PEERR II, which supports ...
