What is a legally required standby system?

Let's look more closely at legally required systems. Article 701 covers the installation, operation, and maintenance of legally required standby systems consisting of circuits and equipment intended to supply illumination or power when the normal electrical supply is interrupted.

What is an uninterruptible power supply (UPS)?

Uninterruptible power supplies (UPS) are essential to ensure you have continuous power during a power outage. From a small UPS to save and shut down your PC, to large commercial systems that power large data centers or critical systems in hospitals, we have the solutions you and your customers demand.

What is a standby power system?

Legally required . A government agency requires the facility to have a standby power system, usually due to public safety concerns. Optional . This is a backup the facility owner/operator chooses to have, usually due to financial concerns. The requirements for each differ, and a single facility could have all three types.
