Length: 26 meters. 20 seats 1st class; 58 seats 2nd class. General Establishment of Syrian Railways is the national railway operator for the state of Syria, subordinate to the Ministry of Transportation. It was established...

Why were Syrian Railways built?

The next big developments in Syrian railways were due to the political manoeuvring leading up to and during World War II. As Turkey had sided with Germany in World War I, the Allies were concerned with poor transport in the area, and their ability to bring force on the Turks.

Can the railway be a key part of Syria's economic revival?

Now Malla and others hope the railway can be cleared of its rubble and its dark past and become a central part of Syria's economic revival after war and international isolation. They dream of the railway helping to return the country to its former status as a key link between Europe and the Middle East.

How did Syria transport people from Damascus to Aleppo?

In the following decades, Syria used its section of the railway to transport people between Damascus and its second city of Aleppo, along with several towns and neighboring Jordan.
