Measuring 101.6 cm by 152.4 cm (3.3 feet x 4.9 feet), the laminated power-generating window was developed using the company's ...

Discover what photovoltaic glass is, how it works, and how to integrate solar energy and automation into homes and businesses efficiently and sustainably.

Measuring 101.6 cm by 152.4 cm (3.3 feet x 4.9 feet), the laminated power-generating window was developed using the company's pilot production line. The new product ...

The NEXT solution empowers architects and building owners to transform traditional windows and glass facades into producers of low-cost, on-site, renewable energy ...

SCHOTT®; Solar Glass exos combines optical stability, thermal compatibility, and high scalable production to meet the requirements of next-generation space missions.

NEXT Energy Technologies has taken a groundbreaking step in the field of organic photovoltaic (OPV) technology by upgrading its pilot production line to manufacture the world's ...

Next Energy Technologies, a California-based company, has recently announced an innovative breakthrough in the world of solar ...

NEXT Energy Technologies upgraded its pilot production line to produce 40-by 60-inch laminated transparent power-generating ...

These represent the largest transparent organic photovoltaic (OPV) windows produced to date, demonstrating the scalability of NEXT's automated slot-die coating process. ...

NEXT OPV coatings address the three big challenges to creating a scalable solution for the commercial glass industry: aesthetics, ...
