Researchers at ENIT are developing thermal energy storage systems that store excess solar energy in molten salt. Early tests show 72-hour heat retention - perfect for ...

A consortium of Norway's Scatec and Japan's Aeolus, a unit of Toyota Tsusho, will develop a 100 MW PV plant near Mazouna in Sidi Bouzid Governorate, all equipped with ...

The World Bank has launched a call for interested consultants to conduct a technical study for a 350 MW to 400 MW solar and battery storage project in Tunisia.

As Tunisia accelerates its renewable energy transition, Sousse has emerged as a focal point for innovative energy storage solutions. This coastal city's new storage systems are reshaping ...

solar PV and wind together accounting for nearly 70%. The integration of these variable energy sources into national energy grids will largely depend on storage technologies, and among ...

TuNur is developing a series of renewable energy projects that will produce low-cost green electrons and molecules in Tunisia for export. Each export project consists of three components:

The World Bank, in collaboration with Tunisia's Ministry of Industry, Mines, and Energy (MIME), has announced the need for a technical study for a substantial 350-400 MWp ...

Major projects now deploy clusters of 20+ containers creating storage farms with 100+MWh capacity at costs below \$280/kWh. Technological advancements are dramatically improving ...

Tunisia is planning to embrace pumped storage, considered the most mature of the stationary energy storage technologies, but also the most expensive. A project has ...

SunContainer Innovations - Summary: Tunisia's energy sector is undergoing a strategic shift toward renewable integration, with advanced energy storage solutions becoming critical for ...
