Why is Tunisia investing in a secure electricity network?

To ensure a resilient electricity network, Tunisia is investing in modern, secure infrastructure. The ELMED interconnection project, which will link Tunisia to Italy by 2028, will play a key role in stabilizing energy supply, while supporting the energy transition in Tunisia and Europe.

Who approves electricity installations in Tunisia?

Installations connected to the low-voltage grid need approval from the Tunisian Company of Electricity and Gas (STEG). Installations connected to the medium- and high-voltage grids require an authorisation from the Ministry of Industry, Energy and Mines.

Who regulates electricity in Tunisia?

MEMTE is responsible for electricity infrastructure, planning and the implementation of national policy in the field of electricity, energy efficiency and renewable energy, with regulatory oversight also carried out by the ministry. Yet, Tunisia has no independent regulator.

Does Tunisia have a power grid?

Tunisia's national grid is connected to those of Algeria and Libya, which together helped supply about 12% of Tunisia's power consumption in the first half of 2023. Moreover, in August 2023, Tunisia's sub-sea connection project with Italy, called ELMED, was approved for \$337 million funding from the European Commission.

The project is consistent with Tunisia's energy transition plans. Indeed, the envisaged project infrastructure is aimed at integrating renewable energies into the national ...

Integrating 35% renewable energy into the national grid will require storage services and systems to help manage the variability and uncertainty in the use of solar and ...

Energy storage may be deployed as stand-alone systems or with power generation as part of a hybrid energy system or microgrid scheme. Energy storage is flexible, dispatchable and ...

The project, estimated to cost \$932 million, consists of the construction of a 600 MW high-voltage direct current cable that will link the grids of Tunisia and Italy and enable ...

interconnection project, which will link Tunisia to Italy by 2028, will play a key role in ...

The 600-MW Tunisia-Italy interconnector line (ELMED), a 200-km undersea cable, will connect both countries' power grids with the intention of increasing energy security, allowing for greater ...

The Tunisian Electricity and Gas Company (STEG) is taking a significant step to advance the nation's renewable energy goals by implementing new measures to streamline ...

This analysis was conducted through close collaboration between the National Agency for Energy Conservation (ANME), the Ministry of Industry, Energy and Mines and IRENA.

Abstract--This article provides a comparative study of the technical requirements applied by the two Tunisian and Algerian countries. This comparison including Low Voltage Ride-Through ...

Be provided for the core energy storage equipment such as the battery containers/enclosures and should be designed, supplied and installed in accordance with local and national certification ...
