-----

On March 25, the 100 MW vanadium redox flow energy storage power station project started construction in the central district of Leshan City. This new energy benchmark project with a ...

A giant solar-plus-vanadium flow battery project in Xinjiang has completed construction, marking a milestone in China's pursuit of long-duration, utility-scale energy storage.

Rongke Power China has just brought the world's largest vanadium flow battery energy project online, marking a massive milestone in long-duration grid-scale energy storage.

The project is also one of the world's largest vanadium flow battery energy storage projects to date. The project provides a total installed capacity of 200 MW / 1,000 MWh, ...

Phase 1 of the Yongren vanadium flow battery (VFB) energy storage project has been successfully completed and connected to the grid on 31 December 2025, marking a ...

The Jimusaer Vanadium Flow Battery is the first storage project in the world to reach the gigawatt-hour scale using this chemistry, a milestone that shifts vanadium systems from niche ...

Recent weeks have seen major progress across the energy storage and battery materials sector, spanning multiple technology routes including LFP, vanadium redox flow ...

A giant solar-plus-vanadium flow battery project in Xinjiang has completed construction, marking a milestone in China's pursuit of long ...

As the first project between TerraFlow and Storion, TerraFlow's flow battery customer has entered into a vanadium electrolyte lease agreement with Storion for the Bellville ...

The project, located in Jimusar County in the Changji Hui Autonomous Prefecture of Xinjiang Uygur Autonomous Region, has a rated power capacity of 200 megawatts and a ...
