What is the electricity access rate in the Democratic Republic of Congo?

The public version of the resulting report of the effort is available here. The Democratic Republic of Congo's national electric-ity access rate is estimated at 19%. Less than 1% of the rural population and 41% of the urban population has energy access. Of the country's 10 million house-holds,only 1.6 million have have access to electricity.

How much solar power does the DRC need?

There is also sufficient for the rural areas around Kinshasa, Mbandaka on the Congo river and the main port of Matadi. It can even be exported over the river to Brazzaville. Currently the DRC only has 2.5 gW installed and no early benefit from the Inga. However solar and wind is available now.

How much solar power does Kinshasa have?

In the area around Kinshasa there is a further 6 gWof solar available at 7 us cents per kW hr. There is also sufficient for the rural areas around Kinshasa,Mbandaka on the Congo river and the main port of Matadi. It can even be exported over the river to Brazzaville.

How will the DRC meet the ELEC-Tricity challenge?

The DRC aims to connect 32% of the country to elec-tricity by 2030. Meeting this challenge will require co-ordinated efforts from various stakeholders, support-ive policies and regulations, and technical assistance support to prospective projects in order to attract in-vestments.

in Matadi, DR Congo. To maximize your solar PV system"s energy output in Matadi, DR Congo (Lat/Long -5.8208, 13.4448) throughout the year, you should tilt your panels at an ...
