What is the difference between `.size()` and `.length` ? Is `.size()` only for arraylists and `.length` only for arrays?

As you know, matlab deals mainly with matrices. So, the size function gives you the dimension of a matrix depending on how you use it. For example: 1. If you say `size(A)`, it ...

The OP was asking "Array.size () vs Array.length". From the previous discussions, it was make clear, that the "size" Function is not part of standard JavaScript but implemented ...

The approach basically builds on other work where people experimentally identified the size of primitives and typical Java objects and then apply that knowledge to a ...

If the size of the int is that important one can use `int16_t`, `int32_t` and `int64_t` (need the `iostream` include for that if I remember correctly). What's nice about this that `int64_t` should not have ...

In several C++ examples I see a use of the type `size_t` where I would have used a simple `int`. What's the difference, and why `size_t` should be better?

So, the size of `size_t` is not specified, only that it has to be an unsigned integer type. However, an interesting specification can be found in chapter 7.18.3 of the standard: limit of `size_t` ...

Here's a hint: My absolute largest repository contains only images of various formats, it's an "artwork" repo of icons which I use in various apps. Yet, GitHub reports the size as 0. So I'm ...
