But have you ever wondered where these magical signals come from? The answer lies all around us, in the mysterious "boxes" and "antennas" standing on rooftops, roadsides, ...

Coverage Area: The coverage area is a base station is that geographical area within which mobile devices can maintain a stable connection with the base station.

SummaryOverviewOperationTemporary sitesEmploymentSpy agency setupOff-grid systemsCamouflageA cellular network is a network of handheld mobile phones (cell phones) in which each phone communicates with the telephone network by radio waves through a local antenna at a cellular base station (cell site). The coverage area in which service is provided is divided into a mosaic of small geographical areas called "cells", each served by a separate low power multichannel transceiver and antenna at a base station. All the cell phones within a cell communicate with the system thr...
