What is an uninterruptible power supply?

Read more about our editorial standards. An uninterruptible power supply, or UPS, is basically a surge protector, battery, and power inverter-- which turns the battery's stored energy into usable power -- in one.

Do you need an uninterruptible power supply (UPS)?

A power failure is more than an inconvenience--it can knock out essential equipment for hours on end. If you have important electronics that have to keep running when the power's out, you'll need an uninterruptible power supply (UPS). Many smart devices have built-in battery packs, with modern laptops packing enough cells to last a whole day.

What is an uninterruptible power system (UPS)?

Uninterruptible power system (UPS) An electrical system designed to provide instant, transient-free backup power during power failure or fault. Some UPSs also filter and/or regulate utility power (line conditioning). User replaceable Capable of being replaced by an end user. Connected equipment may need to be shut down first.

What are the different types of ups power supply?

Typically, according to different working principles, UPS power supply covers standby (offline) UPS, line-interactive UPS, online (double-conversion) UPS. The standby UPS system offers only the most basic features, providing surge protection and battery backup. Thus, its power supply quality is not good enough and the cost is much lower.

We've done some digging into the top picks, backed by data and expert reviews, to bring you the best UPS options for 2024. Let's dive into the ...

We've done some digging into the top picks, backed by data and expert reviews, to bring you the best UPS options for 2024. Let's dive into the best UPS systems tailored for every need, so ...

Explore the best uninterruptible power supply (UPS) options for home use. Compare features, backup times, and reliability to protect your devices from power outages.

We've compared these UPS devices across many factors, like their size, power supply, runtime, and battery recharging time. We looked at what types of environments they'd ...
