Is Zambia's largest solar project ready to be commissioned?

The project, billed as the largest grid-connected solar facility in Zambia and the biggest of its kind in sub-Saharan Africa outside South Africa, is now ready to be commissioned. According to a statement from the company, plans are now underway to develop a second 100 MW phase at the site.

Can solar power reduce load shedding in Zambia?

"This directly helps us meet domestic demand and plays a significant role in lessening load shedding," the company wrote. Zambia's cumulative solar capacity had reached 196 MW by the end of 2024, up from 134 MW at the end of 2023, according to figures from the International Renewable Energy Agency (IRENA).

How much solar power does Zambia have?

Zambia's cumulative solar capacity had reached 196 MW by the end of 2024, up from 134 MW at the end of 2023, according to figures from the International Renewable Energy Agency (IRENA). This content is protected by copyright and may not be reused.
